*CONTINUITY ON QUALITY*

Total area 70.000 sqm. Covered area 25.600 sqm dedicated to production.  
Over 40 machines for metal preparation and machining.

## MANUFACTURING CAPABILITIES

Steel fabrication and mechanical construction in various industrial fields  
Manufacturing and assembly of complete machines and plants  
Turn key project for foundry and metallurgical steel industries

## METALLURGICAL STEEL AND PIPE HANDLING PLANTS

Over the years, the company has specialized in pipe handling plants, all of them carried out for big groups worldwide and is today able to produce complete turn key solutions for:

- *heat treatment*
  - *finishing*
  - *quality control*
- and single machines for:
- *packing*
  - *washing*
  - *marking*

## FOUNDRY EQUIPMENT

The company produces steel structures, machined parts as well as complete machines. In recent years, the company has manufactured and assembled:

- *sand mixers*
- *sand preparation systems*
- *mechanical and thermal reclamations*
- *vibratory machines*
- *drying tunnels*
- *mobile machines*
- *coreshooters*
- *melting furnaces*
- *aluminium chip treatment furnaces*
- *after-burners*
- *complete foundry systems*
